ECHO WARS | RTS COMPLETE ROSTER | UNIT SHEET

Echo Wars
Completed Unit Sheet

Image and lore card only. All 24 units - 16 base + 8 mid-tier - all four factions, one page per unit, canonical render beside its card. Nothing else.

Above: the Flamebearer squad, canonical render. The mid-tier 8 (pages 18-25) complete the roster at 24 units.

HOW TO READ EACH PAGE

Left: the canonical image. Right: the lore card - role, tier, cost, stats, abilities, doctrine and field lore. **HP is always a unit-wide pool** shared across the squad's models, never per model. Exact squad sizes are not yet canonicalized, and all stats are pre-playtest: Monte Carlo sims for the RTS will tune them next. Mid-tier troops carry more faction symbols than core troops, per the tier iconography rule.

Only two costs are **locked**: Wandbearers of Echo (3) and Echo Leech (3). Every other cost - base and mid-tier alike - is provisional. The mid-tier 8 are the locked selections, converted to RTS style.

Faction	Units	Costs
The Awakened Ones Coherence - remind, not conquer	Wandbearers of Echo, Sigil Keeper, Veil Walker, Mirror Sentinel, Glyph Crafter, Prism Adept	3 Resonance, 3 Resonance, 4 Resonance, 4 Resonance, 5 Resonance, 6 Resonance
The Loopbound Repeat the wound. Erase the witness.	Echo Leech, Cycle Priest, Distortion Walker, Anchor-Line Enforcer, Puppet Priest, Null Chorister	3 Resonance, 3 Resonance, 4 Resonance, 4 Resonance, 6 Resonance, 5 Resonance
Architects of Collapse Nothing breaks by accident.	Collapse Scribe, Measure Guard, Nullcaster, Chrono Frame, Geometry Weaver, Fracture Engine	4 Resonance, 3 Resonance, 5 Resonance, 5 Resonance, 4 Resonance, 7 Resonance
The Forgotten Flame Return through ruin.	Flamebearer, Ashbound Votary, Cinder Knight, Pyre Walker, Rekindler, Pyre Herald	3 Resonance, 3 Resonance, 4 Resonance, 4 Resonance, 5 Resonance, 6 Resonance

Canonical squad render. Cost 3 is locked; the reflect-instead-of-attack proposal is parked for playtesting, not on this card.

Wandbearers of Echo

CORE | SUPPORT | COST LOCKED

3 Resonance	240	3-5
COST	HP (UNIT POOL)	SQUAD

12 in	+2
RANGE	WILLPOWER

ABILITIES

- **Resonance Pulse** (Active) - A steadying pulse - allies regenerate and shake off panic.
- **Dispel Loop** (Reaction) - Negates illusion, psychic and rage effects in radius.
- **Recalibrate Field** (Support) - Removes debuffs and restores 1 Willpower.

PASSIVES

- **Low Signature Presence** - Enemies are less likely to directly target Wandbearers.
- **Echo Chain** - Chained units emit a Collapse Wave.

> They were the first to hear the field remember itself - listeners who survived the Collapse with their attention intact. Now they walk Nytherra's broken places with tuned wands: not weapons, but instruments. Where a Wandbearer stands, resonance steadies. They do not conquer the field. They remind it what it is.

FIELD LORE

"One of them stood between two rival war-hosts, closed his eyes, and began the Resonance Pulse. In the silence, both lines laid down their arms and wept."

Canonical render - single model, not a squad.

Sigil Keeper

CORE | CONTROL / ANCHOR | COST PROVISIONAL

3 Resonance	320	1
COST	HP (UNIT POOL)	MODELS

85	+1
DMG	WILLPOWER

ABILITIES

- **Anchor Field** (Active) - Deploys 2 floating sigil plates; enemies in radius lose 20% speed. Further abilities to be designed in the RTS pass.

Signature item: Sigil Plates - floating plates etched with the field's true shape.

> Where the Wandbearers listen, the Sigil Keepers inscribe. They carry the plates that remember the field's true shape - and where they set them down, the world holds still. Armies have broken against ground a Keeper decided would not move.

FIELD LORE

"The field does not need to be commanded. It needs to be reminded."

Canonical v3 - uniform robes, rank shown by glyphs, no extra gear.

Veil Walker

CORE | FLANK | COST PROVISIONAL

4 Resonance	300	1
COST	HP (UNIT POOL)	MODELS

120	Fast
DMG	SPEED

ABILITIES

- **Veil Step** (Active) - Slips between the Veil and the Field; untouchable mid-step. RTS adaptation to be designed.

Signature item: Veil Orb - a sphere of bound veil-mist; shows the Walker the seams.

> The Walkers go where the field is thinnest - the seams between what is and what was. They do not cross battlefields; they step around them, arriving where the enemy's attention isn't. Every army has a blind side. The Veil Walkers live there.

FIELD LORE

"She does not choose a side. She chooses the moment."

Canonical v2 - faction cape and glyph etchings over the mirror shield.

Mirror Sentinel

ELITE | TANK / REFLECT | COST PROVISIONAL

4 Resonance	380	1
COST	HP (UNIT POOL)	MODELS

90	Slow
DMG	SPEED

ABILITIES

- **Reflection** (Passive) - Reflects 30% of incoming damage. Further abilities to be designed in the RTS pass.

Signature item: Mirror Shield - a tower shield of polished mirror-plate; the shield is the unit's only signature item.

> The Sentinels are the Awakened's answer to violence: a mirror. They do not advance. They do not strike first. They stand - and return what is given. Every army that has faced a Sentinel line has, in the end, fought itself.

FIELD LORE

"To strike it is to instruct it."

Canonical render - dog-like swarm form, locked. HP 90 is the unit pool: 3 bodies at 30 each.

Echo Leech

CORE | SWARM / DRAIN | COST LOCKED

3 Resonance	90	3 bodies
COST	HP (UNIT POOL)	SQUAD

40 / body	Fast
DMG	SPEED

ABILITIES

- **Resonance Drain** (Passive) - Each bite siphons resonance; always deploys as a triple, never alone.

> The Leeches are what happens when hunger learns to run in formation. They do not hunt the body - they hunt the field itself, lapping up the resonance that holds an army together. Kill one and the pattern barely notices. Kill two and the third is already behind you.

FIELD LORE

"They are not three. They are one pattern, running."

Canonical render - compact recursion relic, incomplete circular motif, broken-circle embroidery.

Cycle Priest

CORE | RECURSION | COST PROVISIONAL

3 Resonance	280	1
COST	HP (UNIT POOL)	MODELS

80	Steady
DMG	SPEED

ABILITIES

- **False Return** (Death trigger) - On death, the cycle refunds part of its cost; the next reinforcement arrives cheaper. RTS adaptation to be designed.

Signature relic: Cycle Ring - an open, deliberately incomplete circular mechanism; a fragment orbits it forever, repeating a circuit that never closes.

> The Priests tend the wound that never closes. Each carries a broken ring - a circle that refuses to finish - and where they walk, endings come undone. They have died in corridors you have never seen, and they remember the way back.

FIELD LORE

"He has died in this corridor before. He knows where to go."

Canonical render.

Distortion Walker

ELITE | FLANK / DISRUPTION | COST PROVISIONAL

4 Resonance	260	1
COST	HP (UNIT POOL)	MODELS

110	Fast
DMG	SPEED

ABILITIES

- **Fracture Step** (Passive) - Leaves a distortion trail; enemies crossing it are slowed 25%.

> Walkers do not travel. They recur - arriving where they have already been, which is always somewhere you are not looking. The trail they leave is not damage. It is a reminder that the ground itself has started to doubt where it is.

FIELD LORE

"It does not move through space. It moves through the memory of space."

Canonical render - at 480 HP, the heaviest base unit in the Loopbound set.

Anchor-Line Enforcer

ELITE | CONTROL / PRESSURE | COST PROVISIONAL

4 Resonance	480	1
COST	HP (UNIT POOL)	MODELS

100	Slow
DMG	SPEED

ABILITIES

- **Hold the Loop** (Active) - Chains run to its anchors; nearby enemies are held in the pattern. In its earlier form the rule also blocked conversion for 4 seconds.

Signature relic: Anchor-Stones - rune-etched stones chained to its body, floating at its flanks; where they hang, the loop holds.

> The Enforcers are the Loopbound's full stop. Where they plant their anchors, the cycle holds - no escape, no change, no end. They do not chase. They arrive, they chain the ground to itself, and they wait for you to understand that running was never an option.

FIELD LORE

"Forget the way out. There is only the loop."

Canonical squad render - the Scribe now marches as a squad of three, uniform with every faction's first troop. HP 350 is the unit pool.

Collapse Scribe

CORE | SLOW / CONTROL | COST PROVISIONAL

4 Resonance	350	3
COST	HP (UNIT POOL)	SQUAD

130	Steady
DMG	SPEED

ABILITIES

- **Sequence Mark** (Passive) - Strikes slow target movement by 40%, stacking twice. Squad-conversion balance to be tested.

Signature relic: The Ledger - a bound tome of collapse-patterns, carried by each Scribe.

> The Scribes do not fight battles. They annotate them - and they travel in threes, because no pattern is confirmed until three witnesses agree. Every step an enemy takes is written down, measured, and filed. Once a pattern is written, it can be edited. Nothing breaks by accident.

FIELD LORE

"He does not aim at the unit. He aims at the step after the step."

Canonical render.

Measure Guard

CORE | DEFENSE / FORMATION | COST PROVISIONAL

3 Resonance	420	1
COST	HP (UNIT POOL)	MODELS

95	Slow
DMG	SPEED

ABILITIES

- **Formation Hold** (Passive) - 20% reduced damage while near another Architect unit; the line is the armor.

Signature item: Surveyor's Aegis - a tower shield etched with measurement arcs.

> The Guards measure what they protect. Every wall, every line, every distance between shields is surveyed and set - because a formation is a structure, and every structure the Architects raise is built to outlast the thing trying to break it.

FIELD LORE

"Every ending has a geometry. She is part of it."

Canonical render.

Nullcaster

ELITE | SPELL DENIAL | COST PROVISIONAL

5 Resonance	420	1
COST	HP (UNIT POOL)	MODELS

100	Steady
DMG	SPEED

ABILITIES

- **Null Zone** (Active) - Projects dead air; enemy workings cast within it fail.

Signature relic: The Empty Cage - a hollow bronze dodecahedron holding a sphere of dead air.

> The Nullcasters do not counter spells. They audit them - and find them wanting. Every working is a structure, and every structure the Architects examine either holds or it does not. Around a Nullcaster, nothing holds.

FIELD LORE

"The calculation is simple. Your spell does not exist."

Canonical render.

Chrono Frame

ELITE | TIMING / DELAY | COST PROVISIONAL

5 Resonance	380	1
COST	HP (UNIT POOL)	MODELS

120	Slow
DMG	SPEED

ABILITIES

- **Interval Lock** (Passive) - Its strikes delay the target's next attack.

Signature: Its own clockwork frame - clock-dial ring and pendulum blade; the body is the relic.

> The Frames are the Architects' patience given a body. They do not hurry, because hurry is a confession that the outcome is uncertain. Every gear turns exactly once. Every blow lands exactly when it was always going to.

FIELD LORE

"It does not hurry. It does not need to."

Canonical squad render - v4 faction uniform: clean charcoal robes, ember-orange trim, flame sigils on hem and sleeves. HP 280 is the unit pool, not per model.

Flamebearer

CORE | FORWARD / AGGRO | COST PROVISIONAL

3 Resonance	280	3
COST	HP (UNIT POOL)	SQUAD

140	Fast
DMG	SPEED

ABILITIES

- **Forward Vow** (Active) - Charges in a straight line, unslowable; first strike at 1.5x. Balance via Monte Carlo sims in the RTS pass.

Signature item: Kindling Dagger - a single short flame-wreathed blade. Not a sword.

> The Bearers walk in threes - the Flame's promise kept on foot. Plain soldiers in ash-dark robes, not champions. They do not wait for the perfect moment. They are the moment, walking forward with a single burning dagger each. What was burned did not vanish. It returned with memory.

FIELD LORE

"It does not wait for orders. It waits for the moment to burn."

Canonical render.

Ashbound Votary

CORE | SACRIFICE / ALLY BUFF | COST PROVISIONAL

3 Resonance	200	1
COST	HP (UNIT POOL)	MODELS

70	Steady
DMG	SPEED

ABILITIES

- **Sacrifice Rite** (Active) - Burns her own life to give nearby allies +20% damage. RTS adaptation to be designed.

> The Votaries are the Flame's tithe made flesh. They do not spend themselves in anger but in devotion - every ember they give away returns to their allies as strength. The Flame remembers what they offered. So does everyone who fought beside them.

FIELD LORE

"She offered the field what she had left. The field remembered."

Canonical render - elite tier, so the faction symbols saturate armor, weapons and background.

Cinder Knight

ELITE | HEAVY / EXPLOSION | COST PROVISIONAL

4 Resonance	380	1
COST	HP (UNIT POOL)	MODELS

160	Slow
DMG	SPEED

ABILITIES

- **Ember Burst** (Death trigger) - On death, deals 150 area damage around the fallen Knight. RTS adaptation to be designed.

Signature items: Twin Pyre Blades - dual flame-wreathed swords.

> The Knights are the Flame's ending made certain. Their armor is etched with every fire they have survived - flame-in-circle over the heart, spirals on the shoulders, seals on the fists. They do not fear death. Death is simply the moment the armor gives back everything it remembered.

FIELD LORE

"The armor remembers every fire it survived."

Canonical render - elite tier: ash sigils and rekindling spirals carry into the background.

Pyre Walker

ELITE | AREA / DEATH EFFECT | COST PROVISIONAL

4 Resonance	320	1
COST	HP (UNIT POOL)	MODELS

130	Steady
DMG	SPEED

ABILITIES

- **Heat Trail** (Passive) - Leaves a burning trail; enemies crossing it take searing damage per second. RTS adaptation to be designed.

> The Walkers are remembrance given legs. They do not hurry and they do not stop - they advance, and the ground behind them refuses to forget they passed. To follow a Pyre Walker is to walk through the memory of fire.

FIELD LORE

"What burns behind it is not destruction. It is remembrance."

Canonical render - mid-tier: denser glyphwork than the core troops, per the tier iconography rule.

Glyph Crafter

MID-TIER | SUPPORT / LANE CONTROL | COST PROVISIONAL

5 Resonance	680	1
COST	HP (UNIT POOL)	MODELS

48	Slow
DMG	SPEED

ABILITIES

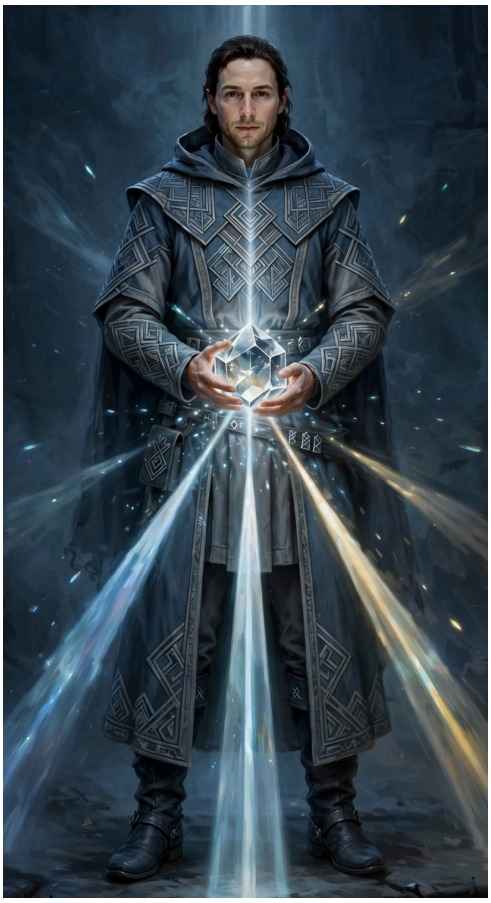

- **Living Inscription** (Active) - Inscribes heal-glyphs onto the ground; allies in them regenerate and resist slows.

Signature tool: Inscription Stylus - a long glyph-brush whose tip burns blue; what it writes on the world, the world keeps.

> The Crafters write the field's recovery into the ground itself. Where a Wandbearer steadies the moment, a Crafter steadies the place - their glyphs linger after they leave, and armies have learned to fight from inscribed ground the way sailors trust a charted coast.

FIELD LORE

"The ground remembers kindness longer than it remembers wounds. He writes the kindness down."

Canonical render - mid-tier.

Prism Adept

MID-TIER | DAMAGE REDIRECTION | COST PROVISIONAL

6 Resonance	620	1
COST	HP (UNIT POOL)	MODELS

85	Medium
DMG	SPEED

ABILITIES

- **Refraction Field** (Active) - Projects a field that bends incoming harm; strikes aimed at allies refract back toward the enemy, diminished.

Signature relic: Refraction Prism - a crystal that splits one beam into three; it does the same to intent.

> The Adepts studied the Sentinel's mirror and asked a better question: what if the blow never arrives at all? Their prisms do not block violence - they edit its address. Every army that has aimed at an Adept's line has hit, instead, itself.

FIELD LORE

"He does not catch the arrow. He convinces it to go home."

Canonical render - mid-tier.

Puppet Priest

MID-TIER | SUMMON / CONVERSION PRESSURE | COST PROVISIONAL

6 Resonance	650	1
COST	HP (UNIT POOL)	MODELS

60	Slow
DMG	SPEED

ABILITIES

- **Borrowed Motion** (Active) - Lends its threads to the fallen; a fragile Marionette rises and dances at its command, and nearby conversions hold longer.

> The Priests do not create soldiers. They reassign the ones the battlefield discarded. Every corpse is a dancer between performances - the Priest simply reminds it of the steps. The Loopbound waste nothing, least of all the dead.

FIELD LORE

"You chose your steps. We merely taught you the dance."

Canonical render - mid-tier.

Null Chorister

MID-TIER | DEBUFF / SPELL DISRUPTION | COST PROVISIONAL

5 Resonance	560	1
COST	HP (UNIT POOL)	MODELS

65	Medium
DMG	SPEED

ABILITIES

- **Silence Loop** (Active) - Rings the cracked bell; a zone of dead air where enemy workings fail and auras wither.

Signature relic: The Cracked Bell - bronze, split down the middle; it has never rung, and that is the point.

> The Choristers sing the Loopbound's oldest hymn: nothing. Their bells are cracked by design - a whole bell would make a sound, and sound is a thing that ends. Around a Chorister, enemy magic arrives already forgotten.

FIELD LORE

"Sing long enough, and even silence forgets itself."

Canonical render - mid-tier, cost 4: the Architects' early-game control piece.

Geometry Weaver

MID-TIER | EARLY CONTROL / FORMATION | COST PROVISIONAL

4 Resonance	580	1
COST	HP (UNIT POOL)	MODELS

50	Medium
DMG	SPEED

ABILITIES

- **Faultline Diagram** (Active) - Draws a slow-strip across the ground; enemies crossing the measured line are dragged down to its pace.

Signature relic: Collapse Tablet - a dark slab etched with fault-line diagrams in white-gold; what is drawn on the tablet appears on the ground.

> The Weavers are the Architects' first answer - deployed early, exactly where the enemy means to be fast. They do not chase. They draw the line the enemy must cross, and the line has already decided how quickly. Every battlefield is a diagram. The Weaver simply fills it in.

FIELD LORE

"He does not slow you. The geometry was already slow. He merely showed it to you."

Canonical render - mid-tier siege. At 1,200 HP (unit pool), the heaviest mid-tier unit.

Fracture Engine

MID-TIER | SIEGE / AREA CONTROL | COST PROVISIONAL

7 Resonance	1200	1
COST	HP (UNIT POOL)	MODELS

145	Slow
DMG	SPEED

ABILITIES

- **Designed Rupture** (Active) - Draws the rupture diagram first - a glowing zone the enemy can see - then the ground obeys: heavy damage and lingering slow.

Signature relics: Orbital Disc and Threshold Key - a halo of calculation turning behind its shoulders; the key caps its staff and opens the ground.

> The Engines are the Architects' final argument. They do not hide their intent - the rupture diagram is drawn in plain sight, because inevitability needs no secrecy. You may leave the marked ground. The Engine has already calculated that you won't.

FIELD LORE

"The diagram was drawn before you arrived. You are merely standing in it."

Canonical render - mid-tier: flame sigils and spirals denser than the core troops.

Rekindler

MID-TIER | SUPPORT / RECOVERY | COST PROVISIONAL

5 Resonance	640	1
COST	HP (UNIT POOL)	MODELS

45	Medium
DMG	SPEED

ABILITIES

- **Ember Reprieve** (Active) - Lends its ember to the wounded; allies near the torch knit back together, and its last ember speeds whoever passes it.

Signature relics: Return Torch and Ash Reliquary - a staff crowned with contained ember, and a small caged lantern of the fallen's ash at the belt.

> The Rekindlers carry the Flame's mercy - and mercy, for the Flame, is a loan, not a gift. Their torches have lit a hundred returns. Every soldier who has marched back into the line behind a Rekindler's light knows: the ember was never theirs. It was always the Flame's, lent to them for the next crossing.

FIELD LORE

"He does not heal you. He lends you the fire to heal yourself."

Canonical render - mid-tier.

Pyre Herald

MID-TIER | TEMPO / TELEGRAPH SUPPORT | COST PROVISIONAL

6 Resonance	720	1
COST	HP (UNIT POOL)	MODELS

80	Medium
DMG	SPEED

ABILITIES

- **Omen of the Pyre** (Active) - Raises the reforged blade - a visible omen - then the Flame's line surges: allies strike faster while the omen burns.

Signature relic: Omen Blade - a broken sigil blade, reforged and raised as a standard; its molten fracture line is the visible wind-up before the surge.

> The Heralds are the Flame's turning point made visible. They do not hide the surge - they announce it, blade raised, because a stalemate broken in plain sight breaks twice: once in the line, once in the enemy's nerve. The omen is the weapon. The surge is just the echo.

FIELD LORE

"When the blade goes up, the line goes forward. That is the whole of the omen."
